Brand promise

A low-cost, flexible alternative to silicon

25-word description

Pragmatic is revolutionising semiconductor fabrication with ultra-low-cost, flexible integrated circuit technology that makes it quick and easy to embed intelligence almost anywhere.

50-word description

Pragmatic is revolutionising semiconductor fabrication with ultra-low-cost, flexible integrated circuit technology that makes it quick and easy to embed intelligence almost anywhere.

With rapid cycle times that substantially accelerate time to market, its foundry provides high-volume fabrication at a fraction of the cost of silicon, and with significantly lower environmental impact.
