## Statement of Compliance REACH/RoHS/SVHC/PFAS

In accordance with the European Union REACH Regulation (EC No 1907/2006), **Pragmatic Semiconductor Ltd**. confirms its commitment to full compliance with the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

**Pragmatic** hereby declare that:

- No substances of very high concern (SVHCs) listed on the **EU REACH Candidate List** are intentionally added to our semiconductor products above the threshold of 0.1% w/w, unless otherwise stated.
- We maintain active communication with our suppliers and downstream users to ensure transparency and compliance throughout the supply chain.
- Our products are designed and manufactured to meet the highest standards of chemical safety and environmental compliance, including REACH, RoHS, and other applicable EU directives.
- We are actively working with our suppliers to identify and eliminate the use of PFAS (per- and polyfluoroalkyl substances) and their related constituents from our approved chemical inventory. Where feasible, we are transitioning to non-PFAS alternatives to support safer, more sustainable manufacturing practices.

**Pragmatic** will continuously monitor updates to the EU REACH Candidate List and regulatory changes issued by ECHA, and will revise this statement accordingly.

Yours sincerely

*M Hobson*
Michael Hobson: Quality and Compliance Director

*D Scaglione*
Daniel Scaglione: VP Procurement and Supply Chain

## Appendix A: Third-Party Testing

On 11 September 2025, independent third-party testing was conducted on the following products:

- **PR1301 Wafer Foil**
- **PR1301 Inlay**

Both products were analysed for compliance with EU REACH requirements, specifically screening against the full Candidate List of substances subject to authorisation under **Annex XIV** of Regulation (EC) No 1907/2006.

**Summary of Results:**

- All 250 substances listed in the REACH Annex XIV Candidate List were tested.
- No substances were detected above the established threshold.
- The analytical detection limit was set at **10 parts per million (ppm)**.
- Both products passed all relevant chemical safety criteria under REACH.

Documentation and full test reports are available upon request.
